

# Nocks and Tips

Robinhood Archery Club Newsletter

Sept 27, 2009

Hello club members,

Hunting season has finally arrived and it has been pretty nice weather to start things off, none of the 95 degree 100 per cent humidity days that I remember enduring in the past. I have been out hunting a few times already and have seen deer each time out but no deer shot at yet. I haven't heard of any club members getting any deer yet but know 3 people who have does in the freezer from this season already so if any of you have connected I'd like to hear about it and get a tally of deer our club members have taken just to see what kind of impact the 50 or so people in the club have on our local deer population. Anyone going out of state for elk, antelope, bears, goats or sheep? I am interested in hearing about this also. You can email me your hunt story and photos and I'll forward them to get them on the RAC website or you can just stay anonymous and I'll report general facts and numbers if you don't want the publicity.

The outdoor league is over for the year as well as our 3d's at Calvin Crest, and I want to thank Frank Hasek for running outdoor league and Gene Metschke and everyone else that helped with our 3d's this past year. Word is getting out that we have an awesome site for holding 3d's and our numbers keep growing, so thanks again to all have helped make our 3d's a success.

Next up on our list of things to do is our leagues for fall and winter. JOAD has started and we will be setting start dates for the rest of our leagues at the next club meeting. Spot target league will be on Mondays and Parks and Rec Kids league Thursdays, JOAD on Fridays. Wednesday animal league we will talk about as it has been too small in the fall lately to hold it. If you want to shoot it come to the monthly club meeting on Tuesday night Sept. 28<sup>th</sup> at 7 pm and let us know, we want to have as many opportunities for you to shoot leagues as possible.

Next month is membership renewal month so you will be getting a letter in the mail soon about yearly dues and key exchanges. The lock gets changed on the meeting date on October 27th so mark that on your calendar if you want to use the indoor range after that date.

Our September meeting date is Sept. 29<sup>th</sup> at 7 pm at the indoor range.

I hope to hear some harvest reports from you. Hunt hard and be safe out there this year.

Dave Kerschinske
