

Noc's and Tips

Robinhood Archery Club Newsletter

January 29, 2011

Hello Club members;

January is almost over and hunting is over for us until Turkey season starts in 2 months. What do we do to take up the time between seasons? How about shed hunting, with snow on the ground you can find where the deer have been traveling, you can find their winter travel patterns between feed and bedding areas. These areas are excellent spots to begin your search, any shed antlers you find is proof that there is a buck in the area that survived hunting season, he most likely will still be alive come hunting season next fall. This is also a very good time to pull out your stands for off season repairs, maintenance etc. and find new places to put up those stands that didn't quite work out for you last fall

Some other things to do this winter is going to outdoor sport shows, Pheasant Quest is at the Qwest center this weekend, and the boat shows always are fun to attend and get some ideas for the coming year. The Nebraska Big Buck Classic will be coming up and it just gets bigger every year. Don't forget about the indoor 3d archery tournaments at Full Draw, Wahoo and in Columbus, these are also a lot of fun, don't require near the walking that your typical outdoor 3d event will have. Look at the events calendar to find the dates and times for these.

As I mentioned in my last little email, I am glad we had a good turnout for the banquet but wish everyone could attend, I know the weather wasn't the best and that may have kept some people away, but plan to attend next year and get to know some of the members of your club, I know our club has some of the friendliest people you'd ever want to meet and you'd have a good time and possibly win a door prize. How can you beat that?

Adult leagues are going on again and you can still start if you'd like. Kids' leagues just are getting going and look to be pretty busy, Call Parks and Rec to sign up for kids league on Thursday or JOAD on Friday.

That is all for this month.
